

KIM OSZ

Kim was born and raised in Calgary, Alberta and has developed a passion for cosmetic tattooing. This passion stems from the diagnosis of late onset alopecia incurred by her aunt in 2014. Being able to correct and improve the appearance and wellbeing of her clients makes for a highly rewarding career. She comes from a nutrition background and made the career switch last year.

Kim trained in Vancouver under Lisa Lam who has over 25 years of experience with a skillful hand and medical knowledge as an ophthalmologist

MICROBLADING

Microblading is a semi-permanent eyebrow procedure that is carried out by a qualified technician using a specialist hand-tool which holds tiny, sterile, disposable needles.

While traditional body tattoos use an electric tattoo machine and permanent ink, microblading deposits mineral based pigment into the superficial dermis of the skin allowing the technician to create crisp hair strokes. These hair strokes mimic the appearance of the natural eyebrow hair, naturally enhancing the features of the face.

FAQ

Q: Do I have to shave my eyebrows?!

A: Absolutely not!! The hair-like strokes are applied through the existing hair.

Q: What should I expect during my visit?

A: First, a consultation discussing shape and color. An outline will then be drawn and a topical anaesthetic is applied. Then we can start! You will be laying down for majority of the procedure but will be asked to sit up occasionally to ensure symmetry

Q: Is it painful?

A: Using a scale of 1 – 10 most clients feel a 2 or 3.

Everyone has different levels of tolerance however the topical anaesthetic has great numbing properties

Q: Who benefits from semi-permanent cosmetics?

A: Men and women of all ages and ethnicities, some main reasons are:

- Hair loss (Alopecia)
- Poor eyesight or shaky hands
- Active lifestyle (swimming/sweating)
- Pigment loss (Vitiligo)
- Asymmetrical features
- Allergies to cosmetics
- Scars
- Convenience – thin or sparse eyebrows are a thing of the past!

BEFORE & AFTER
